

Let one of our knowledgeable representatives conduct a demonstration for your team to show how our various Vibra-Tite products work. There's no need to travel. We provide the training right at your plant or office. We know how important your time is, so we've packed a lot of valuable information into our one-hour presentation.

Contact Terry Duffiney at 248-321-2528 to schedule your product training session.

## TRAINING OUTLINE

### THREADLOCKING

- How a threaded fastener works
- Advantages & disadvantages of mechanical locking
- Chemical Threadlockers
  - How they work
  - Choosing the right formulation and strength
  - Application techniques
- Hands-on demonstration

### THREAD SEALING

- Where to use
- Causes of leaks
- Chemical Thread Sealants
  - Why they are better than tradition tapes or dopes
  - Choosing the right formulation and strength
- Hands-on demonstration

### GASKETING

- Understanding Gaskets
  - How they work
  - Why they can fail
- Form-in-place gasketing
  - Choosing the right formulation and strength
  - Rigid flanges vs. flexible flanges
- Anaerobics vs silicones
- Hands-on demonstration

### RETAINING

- Where to use Retaining Compounds
- Retaining Compounds
  - How they work
  - Choosing the right formulation and strength
  - Slip fit vs press fit assemblies
  - Application techniques
- Hands-on demonstration
