RE: Proposition 65 Listings and Warnings

Dear Valued Customer,

The State of California's Environmental Protection Agency - Office of Environmental Health Hazard Assessment published the Safe Drinking Water and Toxic Enforcement Act Of 1986, better known as Proposition 65. Proposition 65 requires California to publish a list of chemicals known to cause cancer, birth defects or other reproductive harm. Proposition 65 also requires businesses to provide warnings to Californians about the inclusion of listed chemicals within their products, unless the exposure is low enough to pose no significant risk.

As of the date of this letter, Vibra-TITE® Products are labeled appropriately and in respects to the requirements of Proposition 65. This means that if any Vibra-TITE® products contain a Proposition 65 listed chemical(s) at or above the No Significant Risk Level (NSRL) or Maximum Allowable Dose Level (MADL); the labeling and/or packaging of the product will reflect its inclusion through the prescribed warning statements provided within the Proposition 65 regulation. Furthermore, this compliance statement only applies to the products manufactured and applied to a fastener or substrate and not the fastener or substrate itself.

If you have any questions, please contact me at your convenience.

Sincerely,

Ajay Jain
